

Pull List Scenarios (also called the Paging List):

**1. Previously pulled title/barcode continues to appear on the Pull List.**

Investigate to see if there is a new hold. Sierra may have grabbed that same barcode number even though it is no longer available.

**2. Title stays on the Paging List after it was set to missing.**

We hope that the next Sierra upgrade fixes this.

**3. Same title and barcode appears on the Paging List multiple times.**

This means there are multiple requests for this title. Search Sierra by the barcode for additional available copies at your location, locate and check in.
