**PROJECT ABSTRACT**

Provide an overview of the project, including its purpose and intended outcome based on targeted population(s) and identifiable need.

Wisconsin Valley Library Service will contract with Zoobean, Inc. to provide the Beanstack web service and mobile application for Wisconsin public libraries who opt-in to use the product to create, manage, and measure summer and school-year reading challenges for readers and library users of all ages. Wisconsin public libraries will have the ability to customize reading challenges and allow patrons to register, track reading, and earn incentives. Zoobean, Inc. will provide data driven insights that show the value a library plays in the community.

**NEEDS AND ASSETS ASSESSMENT**

Provide evidence of the need for this project and the resources and capacity the applicant(s) brings that make the agency(ies) qualified to take on the project. Include why this project is relevant to the targeted region or population. Include how this project supplements local efforts within the region or community. Describe any other relevant past (within the last five years) or current efforts to meet these needs.

The COVID-19 pandemic has created an immediate need to provide alternative methods for virtual and socially distant programming that still engages library users and promotes reading throughout the summer and full year. There was already a need to engage readers where they are virtually, and this online product and the additional service from Zoobean, Inc. and other library system staff meets that need.
